Quick ER Checklist:

We know this is scary, but you're doing the right thing. To help the doctors help your baby faster, try to grab these before you leave:

Current Meds: Bring the actual bottles so dosages are 100% accurate.

The "Evidence": Take a photo of whatever they ate or the packaging.

Phone Charger: Stay connected for medical updates during the wait.

Take a deep breath. You've got this, and they are in good hands.
